REPORT SUMMARY

The information contained herein is submitted in accordance with the requirements of Solid Waste Permit Number SW07300014, SW07300015, SW07300045, and 401 *KAR* 47:190 § 8, *Landfill Recordkeeping and Reporting*, for the second quarter of calendar year 2026 for the Paducah Gaseous Diffusion Plant, McCracken County, Kentucky.

In the second quarter of calendar year 2026, a total of 247.47 tons of industrial waste was disposed of in the C-746-U Contained Landfill. There were zero tons of asbestos-containing materials disposed of as part of the 247.47 total tons of waste dispositioned. No special waste or spill-residue-containing materials were disposed of in the landfill this quarter. As directed by the Cabinet, the Waste Quantity Report, DEP-7046-Q, is submitted as a separate report.

Analytical results for surface water monitoring, groundwater monitoring, and methane monitoring are submitted in separate quarterly Compliance Monitoring Reports for the C-746-U Contained Landfill and C-746-S&T Landfills (401 *KAR* 47:190 § 8, *Landfill Recordkeeping and Reporting*).

The C-746-S Residential Landfill has been inactive since July 1995, and the C-746-T Inert Landfill has been inactive since June 1992.

Leachate Collection and Disposition

Leachate is primarily stored in five holding tanks (F-001, F-002, F-007, F-008, and F-009) with a total capacity of 104,200 gal. In the event that leachate cannot be managed solely with the primary tanks, 64,000 gal of additional storage capacity is available in reserve tanks F-010, F-011, F-012, and F-013. Tank F-004 is a 2,500-gal surge tank for the leachate treatment system. Storage tanks F-003, F-005, and F-006 were removed from service in 2014. The total leachate storage capacity is 170,700 gal.

The tank volume reported on the leachate log is the volume at the time of measurement. Calculation of the next day tank volume by subtraction of disposal volume may not reflect the measured tank volume because additional leachate had entered the system. A total of 216,300 gal of leachate from the C-746-U Contained Landfill was treated at the C-746-U15 Leachate Treatment Facility this quarter. A total of zero gal of leachate from the C-746-S Residential Landfill was treated at the C-746-U15 Leachate Treatment Facility this quarter. There was no leachate transported to the other treatment facilities.

Construction Activities and Cover Maintenance

There were no construction or cover maintenance activities associated with the C-746-S&T Landfills (401 *KAR* 47:190 § 8, *Landfill Recordkeeping and Reporting*). The landfills were inspected for subsidence in accordance with the cover requirements (401 *KAR* 48:080 § 9, *Final Cap System Specifications*). No repairs were necessary during the quarter.

There were no construction or cover maintenance activities at the C-746-U Contained Landfill (401 *KAR* 47:190 § 8, *Landfill Recordkeeping and Reporting*). The landfill was monitored for vegetation control and erosion. The landfill was managed in accordance with the cover requirements (401 *KAR* 48:090 § 4, *Cover Material and Disease Vector Control Requirements*). No repairs were necessary during the quarter.
