Pending CERCLA Determinations

Facilities Pending Future CERCLA Determination - Due to the nature of material utilized and use over the past years, the following facilities will require further screening during or after deactivation to determine if CERCLA Site are necessary. This list of facilities will be included in the Paducah Federal Facility Agreement Site Management Plan as Appendix 6 and identified as facilities that are uncertain and a process and time frame for screening will be identified in the FY 2019 Site Evaluations Management Plan.

Mobile Storage Sheds

Mobile Storage Sheds—The following facilities are mobile storage sheds used to house hand tools, PPE, emergency management and miscellaneous equipment/supplies. No industrial activities are associated with these sheds and they will not require CERCLA Site Evaluations and are excluded from CERCLA requirements and the FFA.

Depleted Uranium
Hexafluoride (DUF₆) Conversion Facility List*

DUF₆ Buildings and Facilities—The following facilities were constructed or established to support the DUF₆ processing plant or storage yards used for storage of cylinders awaiting processing. These facilities were constructed in the late 1990 post-2000 timeframe and are not associated with the legacy gaseous diffusion plant operations. These facilities are not related to the contamination of the NPL site; however were constructed over areas of legacy contamination. The soils beneath these facilities that are identified in the Site Management Plan will undergo CERCLA actions upon completion of the DUF₆ mission.

PGDP NUMBER	DESCRIPTION	MAP LOCATION	GROUP NAME	Year Built Source: FIMS	Current Use Source: FIMS
