The control limits are currently 75 to 125% per the method. This is a new spike and sufficient datahave not been collected to establish in-house control chart limits. One matrix spike performed poorly resulting in lower recoveries and higher percent differences between the two spikes causing the other matrix spike exceptions to control.The following compounds were tentatively identified.Diisoamylene 54063-09-1 Tetracosane 646-31-1* Pentacosane 629-99-2* Octacosane 630-02-4* Nonacosane 630-03-5* Hentriacontane 630-04-6* *TIC in the method blank.D.J. 149872	URGA	Radium-226	pCi/L	U	RL-7129	MW363UG4-09	U	REG	MW363				WG	7/8/2009				The minimum detectable activity (MDA) for the batch reagent blank (RB) did not meet the requested detection limit (RDL) at 5 pCi/L and the activity in the RB exceeded the MDA. All reported Ra-228 activities associated with the batch were below the respective MDAs. Since contamination is not a statistical possibility, the data will be commented but not qualified. Additional investigations will be preformed to attempt to determine cause. Sample analyzed on Gamma-1. The minimum detectable activity (MDA) for this sample did not meet the requested detection limit (RDL) at 5 pCi/L for the Ra-228. After a thorough investigation, the reason for the exceedance is unknown. The sample size and count time were increased to facilitate the meeting of the RDL limit. The data is commented. 149894	URGA	Radium-228	pCi/L	=	RL-7129	MW363UG4-09	UX	REG	MW363				WG	7/8/2009				The minimum detectable activity (MDA) for the batch reagent blank (RB) did not meet the requested detection limit (RDL) at 5 pCi/L and the activity in the RB exceeded the MDA. All reported Ra-228 activities associated with the batch were below the respective MDAs. Since contamination is not a statistical possibility, the data will be commented but not qualified. Additional investigations will be preformed to attempt to determine cause. Sample analyzed on Gamma-1. The minimum detectable activity (MDA) for this sample did not meet the requested detection limit (RDL) at 5 pCi/L for the Ra-228. After a thorough investigation, the reason for the exceedance is unknown. The sample size and count time were increased to facilitate the meeting of the RDL limit. The data is commented. This is a new spike and sufficient data have not been collected to establish in-house control chart limits.One matrix spike performed poorly resulting in lower recoveries and higher percent differences between the two spikes causing the other matrix spike exceptions to control.All results are estimated due to three surrogates recovering below the lower control chart limits.The following compounds were tentatively identified. Tetracosane 646-31-1* Octacosane 630-02-4* Nonacosane 630-03-5* Triacontane 638-68-6 Hentriacontane 630-04-6* Dotriacontane 544-85-4 *TIC in the method blank.D.J. 151879	LRGA	4-Bromophenyl phenyl ether	ug/L	UJ	SW846-8270	MW364UGLA1-07	JU	REG	MW364				WG	10/17/2006				Phenol and 4-Nitrophenol recovered below the lower control limits in the LCS and the matrix spikes. The control limits are currently 75 to 125% per the method. This is a new spike and sufficient data have not been collected to establish in-house control chart limits.One matrix spike performed poorly resulting in lower recoveries and higher percent differences between the two spikes causing the other matrix spike exceptions to control.All results are estimated due to three surrogates recovering below the lower control chart limits.The following compounds were tentatively identified. Tetracosane 646-31-1* Octacosane 630-02-4* Nonacosane 630-03-5* Triacontane 638-68-6 Hentriacontane 630-04-6* Dotriacontane 544-85-4 *TIC in the method

152760	LRGA	Butyl benzyl phthalate	ug/L	UJ	SW846-8270	MW364UGLA1-07	JU	REG	MW364				WG	10/17/2006				Phenol and 4-Nitrophenol recovered below the lower control limits in the LCS and the matrix spikes. The control limits are currently 75 to 125% per the method. This is a new spike and sufficient data have not been collected to establish in-house control chart limits.One matrix spike performed poorly resulting in lower recoveries and higher percent differences between the two spikes causing the other matrix spike exceptions to control.All results are estimated due to three surrogates recovering below the lower control chart limits.The following compounds were tentatively identified. Tetracosane 646-31-1* Octacosane 630-02-4* Nonacosane 630-03-5* Triacontane 638-68-6 Hentriacontane 630-04-4* Dotriacontane 544-85-4 *TIC in the method blank.D.J.
