The control limits are currently 75 to 125% per the method. This is a new spike and sufficient data have not been collected to establish in-house control chart limits.One matrix spike performed poorly resulting in lower recoveries and higher percent differences between the two spikes causing the other matrix spike exceptions to control.All results are estimated due to three surrogates recovering below the lower control chart limits.The following compounds were tentatively identified. Tetracosane 646-31-1* Octacosane 630-02-4* Nonacosane 630-03-5* Triacontane 638-68-6 Hentriacontane 630-04-6* Dotriacontane 544-85-4 *TIC in the method blank.D.J. The control limits are currently 75 to 125% per the method. This is a new spike and sufficient data have not been collected to establish in-house control chart limits.One matrix spike performed poorly resulting in lower recoveries and higher percent differences between the two spikes causing the other matrix spike exceptions to control.All results are estimated due to three surrogates recovering below the lower control chart limits.The following compounds were tentatively identified. Tetracosane 646-31-1* Octacosane 630-02-4* Nonacosane 630-03-5* Triacontane 638-68-6 Hentriacontane 630-04-6* Dotriacontane 544-85-4 *TIC in the method blank.D.J. The control limits are currently 75 to 125% per the method. This is a new spike and sufficient data have not been collected to establish in-house control chart limits.One matrix spike performed poorly resulting in lower recoveries and higher percent differences between the two spikes causing the other matrix spike exceptions to control.All results are estimated due to three surrogates recovering below the lower control chart limits.The following compounds were tentatively identified. This is a new spike and sufficient data have not been collected to establish in-house control chart limits.One matrix spike performed poorly resulting in lower recoveries and higher percent differences between the two spikes causing the other matrix spike exceptions to control.The following compounds were tentatively identified. Diisoamylene 54063-09-1 Tetracosane 646-31-1* Pentacosane 629-99-2* Octacosane 630-02-4* Triacontane 638-68-6 Hentriacontane 630-04-6* Dotriacontane 544-85-4 *TIC in the method blank. D.J.
