The current control limits are 75 to 125% per the method. This is a new spike and sufficient data have not been collected to establish in-house control chart limits.One matrix spike performed poorly resulting in lower recoveries and higher percent differences between the two spikes causing the other matrix spike exceptions to control.The following compounds were tentatively identified.Hexadecanoic acid, butyl ester 111-06-8 Octadecanoic acid, butyl ester 123-95-5 Tetracosane 646-31-1* Pentacosane 629-99-2* Octacosane
